Business overview

Our product is a social finance platform that helps college students and young adults get peer-to-peer funding, collaborate on projects, and gain financial support from a trusted community.

01

Who is it for?

- Students needing funding for:
 - Club events
 - Creative projects
 - Startups or side hustles
- Young freelancers or creators who want to find partners or backers
- Youth from underserved or low-income backgrounds

What Problems does it Solve?

- **Lack of funding access for student-led projects.**

- **No dedicated platform for peer collaboration + funding + financial advice**

- **Existing crowdfunding platforms aren't student-friendly or community-oriented.**

- **Students often lack trustworthy spaces for financial help or connections.**

How does it work?

- Students post a campaign (project, event, startup idea).
- Other users (students, alumni, donors) can fund or collaborate.
- Built-in chat, comments, feedback to boost community.
- Financial advice boards, verified profiles and gamified learning.

How will it make money? (if needed)

Fees

Small % fee from successful campaigns.

Premium

Optional premium features: campaign boosts, pro tools, early access to investors. ○

Sponsors

Campus/ orgs partnerships or sponsorships.

What Sets Us Apart

Them

Student-Focused from Day One: Everything is designed with their needs, goals, and struggles in mind.

Project-Based, Not Just Donations: Every campaign is tied to a project, event, or goal, like a pitch for student clubs, side hustles, or creative work.

Us

Community-Driven Funding: It's not just about money, it's about support. Students can connect, collaborate, and fund each other like a trusted network

Market analysis and competition

02

Problem/Gap in Market

There are a lot of problems and gaps in the market, these are problems and gaps that our social finance application will address. These problems and gaps are:

- No specific target audience. For a lot of the apps we researched, there was a lack of target audiences. Our research revealed that these apps did not appeal strongly to any particular group of people, leaving people such as Gen Zs, which our app focuses on, feeling left out.

Problem/Gap in Market

There are a lot of problems and gaps in the market, these are problems and gaps that our social finance application will address. These problems and gaps are:

- Another problem was that these social finance applications required a specific financial sector to be useful. For example, one app named Trine Finance only appealed to people looking to deal with solar panel businesses. These leaves an enormous untapped market, which our app will attract.

Problem/Gap in Market

There are a lot of problems and gaps in the market, these are problems and gaps that our social finance application will address. These problems and gaps are:

- Third, our research revealed that a lot of these applications had limited opportunities for community building and interactions. These social finance apps lacked a “social” aspect, leaving more untapped potential for our application.

Target Users

The target users for our application Fundsy are:

Students

- College students who actively use mobile and social applications. These are students who face challenges in securing funding for their personal projects and have no traditional financial support systems available to them.

Target Users

The target users for our application Fundsy are:

Other members of our target audience include:

- Emerging professionals
- Small business owners
- Generation Z

Tech-savvy individuals who are interested in supporting their goal-driven activities that are in need of collective funding.

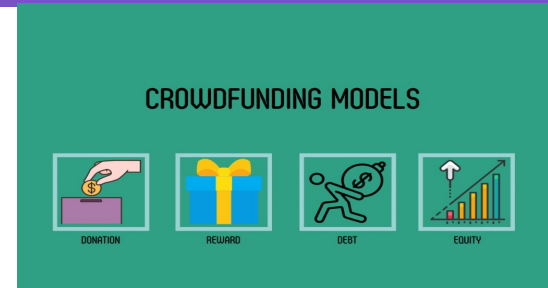

Competitive Analysis

- Other social finance applications such as SoFi, Acorns, Zirtue, etc. target young professionals, and new and retail investors. We target all these as well, and we have opportunities for many kinds of users. However, our focus remains on students and emerging professionals, as our research shows that this demographic often feels left out when it comes to social finance.

Competitive Analysis

- Our application has a social aspect which focuses on building community and relationships to help you on your financial journey, something which these applications lack. This social aspect of our application highlights another area our target audience were neglected. This way, we provide an opportunity for our users in a way that our competitors can not.
- In summary, Fundsy thrives in a niche space that these applications simply do not address. We focus on social accountability for the goals of our users by highlighting community energy and a targeted use case.

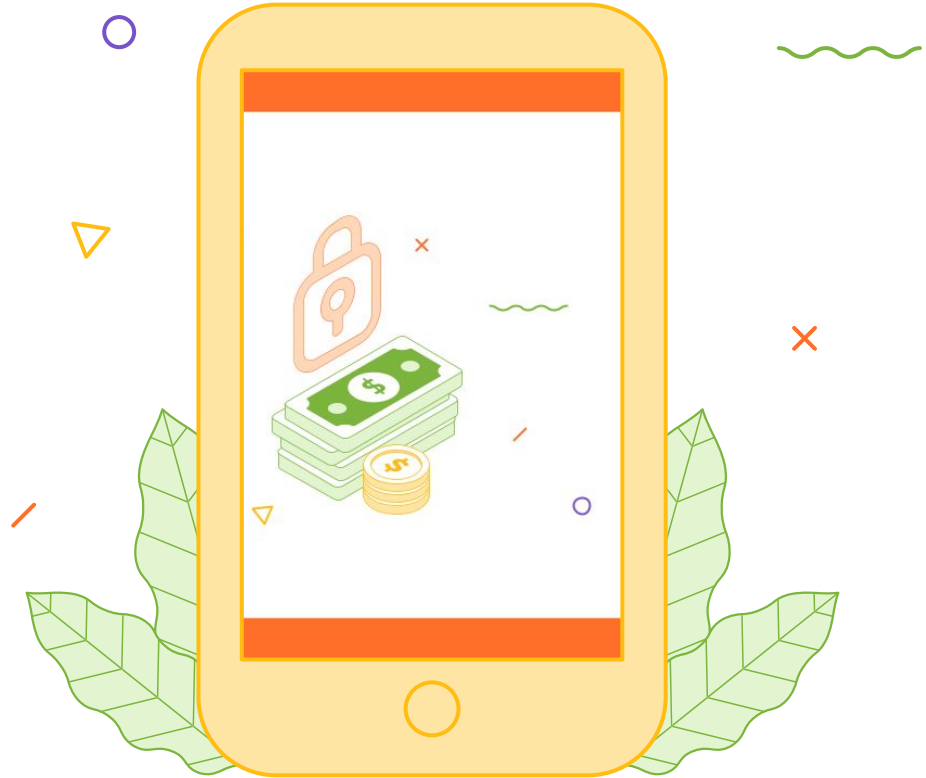

App Overview and Features

03

Platform

- Both desktop and mobile app version will exist (iOS and Android)
- Heavier focus on mobile app

Our features/services

Feed

- In their feed users will see posts from different campaigns.
- Customizable by locality or topic.

Posts

- In campaign posts authors will include text, photos or videos to promote their idea.
- Through posts users access campaign page.
- Users can leave comments and likes.

Campaign Page

- Campaign page shows all posts and additional information related to a campaign.
- On this page users can subscribe, donate or message campaign owners.

Our features/services pt. 2

04

Why Innovation Matters in Social Finance

The Need for Change:

×

- Financial tools operate without understanding the unique circumstances of college students
- The current applications fail to unite social features with financial accountability functions.
- Gen Z members demand digital tools that involve community interaction and participation

What Makes Fundsy Innovative

A Fresh Approach

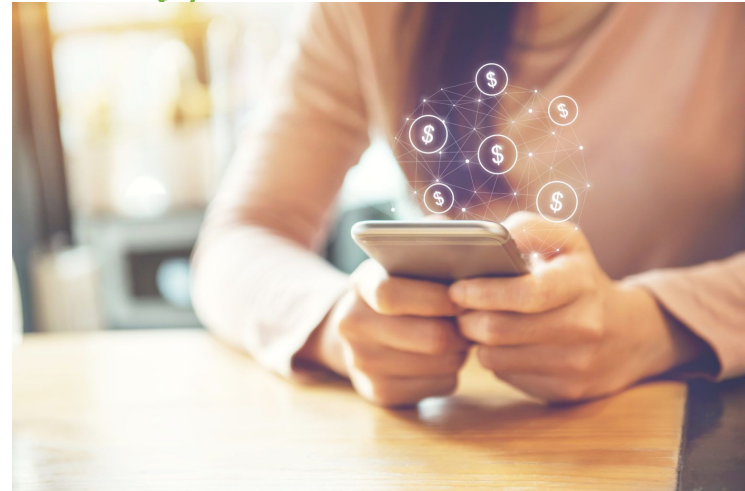

Gamified Savings Features: Encourages strong saving habits by introducing challenges, milestones, and rewards.

Collaborative Group Goals: Allows users to save collectively for shared expenses like trips, rent, and events, promoting teamwork and accountability.

Student-Focused Design: Tailored to accommodate irregular income streams and the unique financial needs of student life.

Integrated Financial Education: Delivers quick, easy-to-understand financial tips and lessons through in-app pop-up messages.

Social Impact on College Communities

Promotes healthy financial habits in a fun, low-pressure environment

Strengthens social ties through shared goals

Fills a critical gap for students with little financial guidance

Encourages saving and budgeting from an early age

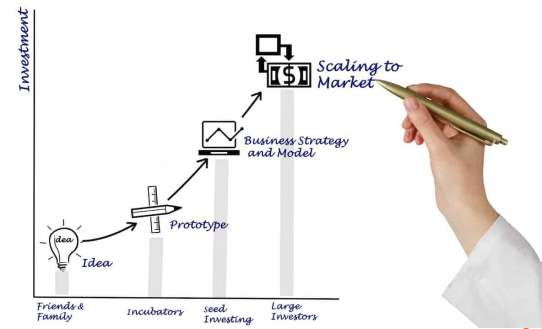

Empowering Student Finance

Broader Potential Impact

Potential to expand to trade schools, gap year programs, or young freelancers

Long-term impact: Students who start saving early carry those habits forward

Future features could include micro-investing or school-specific integrations

Scaling the Idea

Case Study - Real Use Example

05

○ Meet Cindy

- Cindy runs the Black Student Union at Rutgers.
- She wants to raise \$800 for their upcoming Cultural Night (food, decor, speakers).
- She creates a campaign on FUNDSY with a quick story and goal.
- The app shows her campaign to students, alumni, and local supporters.

She receives:

- \$200 from peers
- \$400 from alumni backers
- \$200 from a local business that sponsors her campaign

Her event is fully funded, and she shares a recap on the platform to thank everyone

○ Cindy's Journey: Steps to Success

01

02

03

04

Create a Campaign

Cindy quickly sets up her event with a clear goal and story.

Connect with Supporters

She shares it with students, alumni, and sponsors on the app.

Raise Funds & Collaborate

Donations + advice come in from her network and community.

Deliver & Share Success

Cindy runs her event, posts a thank-you, and builds her rep for future projects.

Go-To-Market Strategy

06

Launch Plan

Spread in Newark

Shortly after launch we will focus on spreading to other colleges in Newark.

National

Spreading on a national level will likely be the hardest step and require a lot of investment in advertising.

Launch at NJIT

Our initial launch will be at NJIT, hopefully with some help from administration.

State level

Colleges in NJ collaborate on many levels, so after a successful launch in Newark we will be able to grow quickly.

International?

Possibly grow large enough to help students finance projects around the globe

Advertising

Initial

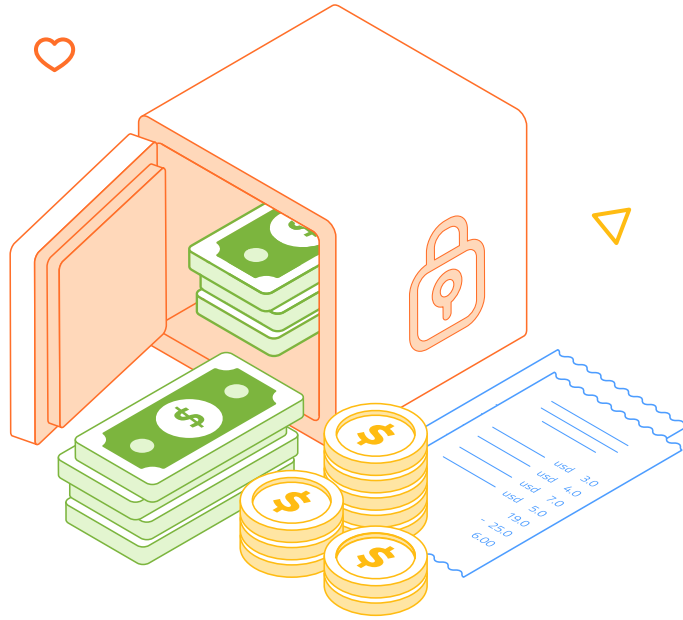

We will try to keep our initial advertising at a fairly low budget.

- On campus
 - College related social media accounts (clubs/organizations/students)
- 

Later stages

With some funds we will be able to move to a more conventional advertising strategies.

- Social media advertising
 - Advertising on websites (especially those often visited by students)
- 
-
